ONR Tokyo Scientific Monograph Series

- ONRT M1 High Pressure Science and Technology in Japan
by Earl F. Skelton, Naval Research Laboratory,
Washington, D.C., July 1978
- ONR-38 An Overview of Materials Science and Engineering
in Japan by George Sandoz, ONR Branch Office,
Chicago, Illinois, December 1977

During the same period in which it was establishing ONR Tokyo and the ONR Tokyo Scientific Monograph Series, the Office of Naval Research supported and sponsored scientific liaison in Japan which led to monographs on selected segments of Japanese science. Those early monographs, which were authored in various elements of the ONR organization, are listed here:

- ONR-28 Superconducting Technology in Japan by Richard G. Brandt, ONR Branch Office, Pasadena, California, June 1971
- ONR-32 A Review of Some Psychological Research in Japan
by Morton A. Bertin, ONR Branch Office, Chicago, Illinois, November 1972
- ONR-34 Computer Science in Japan by Richard L. Lau, ONR Branch Office, Pasadena, California, June 1973
- ONR-36 Chemical Science in Japan by Arnet L. Powell, ONR Branch Office, Boston, Massachusetts, March 1973

PREFACE

A major difficulty faced by visitors to Japan, and those trying to contact Japanese scientists, is the lack of a comprehensive listing of investigators and laboratories. This compilation is the first installment of an attempt to satisfy this need. Similar listings of laboratories supported by other sources will be translated and published as rapidly as possible in this series.

In this volume, the name, address, and telephone number of 317 institutes supported by the Ministry of Education are given. Explanatory notes are added where the specialty of the laboratory is more restricted than indicated by its name, or where the name might be open to misinterpretation.

Japanese addresses are usually written in Chinese characters in the order: zip code, province, town, borough, etc. The transliteration, and expression in an order understandable to both American writers and Japanese postmen, is a non-uniform practice. The addresses are listed in this monograph, wherever possible, in the following order: ban, go, cho, chome, shi, ken, zip code.

The size of each laboratory, in terms of staff and budget, is given for two fiscal years, 1974 and 1976. (Please note that the Japanese fiscal year runs from 1 April to 31 March.) In order to convert from yen to dollars, the following exchange rates existed on 1 April of each year:

1974	\$1 = ¥276.00
1975	\$1 = ¥293.80
1976	\$1 = ¥299.70
1977	\$1 = ¥277.50
1978	\$1 = ¥221.35
1979	\$1 = ¥209.30

We hope that this listing will be useful to those who are trying to identify and contact Japanese scientists.

Note: Organized into the following divisions;

- Applied mathematics
- Applied optics
- Sonics
- Radiation engineering
- Stress-strain relationship
- Hydrodynamics
- Dynamic strength of materials
- Heat-transfer engineering
- Dynamics of moving machinery
- Fluid mechanics
- Thermal-prime-mover engineering
- Strength of curved shapes
- Hull kinematics
- Cutting tool science
- Precision machine-tool science
- Chemical plant safety
- Earthquake-resistance machine mounts
- Electronics
- Electrical engineering
- Communication instrumentation

Electric power instrumentation
 Applied electronics
 Microwave technology
 Computer design
 Information processing technology
 Inorganic industrial chemistry
 Organic industrial chemistry
 Steel smelting technology
 Industrial electrochemistry and photochemistry
 Composite metallic material engineering
 Metallic material science (properties of metals and alloys)
 Radioisotope engineering
 Environmental chemical measurement techniques
 Environmental chemical engineering
